

PRESS RELEASE

NOVEMBER 2018

CELEBRATING 20 YEARS OF ACHIEVEMENT OF ASIAN CAPITAL

For immediate release

Asian Capital, a leading corporate finance house based in Hong Kong, is celebrating its 20th anniversary in 2018. Asian Capital marked its 20th Anniversary with a cocktail reception held at the Hong Kong Club on 16 November that saw more than 200 friends from various sectors joining the celebration.

The evening started with welcoming speech from our founder and Chief Executive, Mr. Patrick Yeung and followed by remarks from our Guest of honour, Dr. Moses Cheng GBM GBS OBE JP.

Mr. Patrick Yeung remarked, “20 years is a long period of time however it is measured. I am so pleased that we have so many friends, clients and business associates that have come through this journey with us.”

Over the past two decades, Asian Capital has been providing financial advice on significant mergers and acquisitions, restructurings and fund raising activities to both private and listed companies as well as various institutions. Its origin can be traced back to 1998 when Asian Capital (Corporate Finance) Limited was first established in response to demands from clients for a corporate finance house with local knowledge and professional expertise in corporate restructuring and resumption. Asian Capital quickly established itself as one of the leading independent corporate finance house in Hong Kong.

We have since gone through our own corporate development including the listing of Asian Capital Holdings Limited in the Growth Enterprise Market of the Hong Kong Stock Exchange in 2010, which was subsequently acquired by a PRC financial conglomerate. Businesses have since been migrated through effectively a management buyout, Asian Capital continues to establish ourselves amongst the leaders in the corporate finance field in Hong Kong. Asian Capital is now active in providing a wide range of corporate finance services to publicly listed companies and private enterprises, particularly in the areas of corporate resumption, financial and corporate restructuring, mergers and acquisitions, divestments, fund raising, and distressed asset recovery.
